

SINGLE-USE PLASTICS

Plastic items do not break down easily and often enter our oceans and waterways, harming marine ecosystems. We are dedicated to reducing our use of plastics, understanding that many items are only used once and then thrown away!

Please help us, and do not use plastic cutlery, plastic straws, plastic water bottles or plastic toiletries. Instead use silverware utensils, bulk toiletries and paper straws.

INSTEAD DO THIS

Where water is not potable, please provide a safe water refill station for travelers to refill their reusable water bottles

Accommodations: Please offer reusable water bottles, such as bottles offered in rooms

Transport providers: Please do not hand out plastic water bottles, instead provide a water tank that allows travelers to refill their own reusable water bottles

Only use single-use plastics when required for health and safety.

We seek to work with partners that have eliminated single-use plastics from their operations. Thank you for your attention to this matter.
